U.S. Department of Agriculture

Dear Customer:

Never in our past business experience has the supply of tree and shrub seed been in so short supply. In many cases, the crop was poor to start. Where there was a fair crop, weather conditions were such that collection of seeds were impossible. Due to this, we do not intend to issue a Spring Price List. Rather, we are forwarding this corrected list of items still available or deleted. Please check carefully against our Fall Catalog before ordering.

Below you will find the item of seed corrected, plus the page number as given in our catalog:
